#### DOCUMENT RESUME

ED 361 190 SE 053 596

AUTHOR Carter, Constance, Comp.; Howland, Joyce, Comp.

TITLE Space Science Projects. LC Science Tracer Bullet.

INSTITUTION Library of Congress, Washington, DC. Science and

Technology Div.

REPORT NO ISSN-0090-5232; TB-92-7

PUB DATE Mar 93

NOTE 17p.; For earlier bibliographies (1986, 1989) on the

same topic, see ED 288 716 and ED 313 232.

AVAILABLE FROM Science Reference Section, Science and Technology

Division, Library of Congress 10 First Street, S.W.,

Washington, DC 20540.

PUB TYPE Reference Materials - Bibliographies (131) -- Guides

- Classroom Use - Teaching Guides (For Teacher) (052)

EDRS PRICE MF01/PC01 Plus Postage.

DESCRIPTORS \*Astronomy; Elementary School Science; Elementary

Secondary Education; High Schools; \*Science Education; \*Science Projects; Secondary School

Science; \*Space Sciences

#### **ABSTRACT**

This document presents sources to assist elementary and secondary school students and teachers in planning, preparing, and executing projects in the space sciences. Bibliographies for the following sections are included: (1) Basic Texts, (2) Specialized Texts, (3) Classroom Experiments and Activities, (4) Background Readings, (5) Related Titles, (6) Handbooks and Encyclopedias, (7) Bibliographies, (8) Book/Film Reviews and "Best Book" Sources, (9) Abstracting and Indexing Services, (10) Representative Journal Articles, (11) Selected Materials, and (12) Additional Sources of information. A list of relevant Library of Congress subject headings is also included. (PR)

# SPACE SCIENCE PROJECTS

Compiled by Constance Carter and Joyce Howland

TB 92-7

March 1993

Scope: Sources to assist elementary and secondary school students and teachers in planning, preparing, and executing projects in the space sciences. Sources in other areas of science and on science fairs themselves are listed in <a href="Science Fair Projects">Science Fair Projects</a>
(LC Science Tracer Bullet 91-12). This compilation is not intended to be a comprehensive bibliography, but is designed—as the name of the series implies—to put the reader "on target."

#### INTRODUCTION

Millspaugh, Ben P. Aviation and space science projects. Blue Ridge Summit, Pa., TAB Books, c1992. 133 p. TL547.M63 1991

Includes projects dealing with air density, wind, balloons, gliders, spacecraft, and many more aviation and space related categories.

<u>SUBJECT HEADINGS</u> used by the Library of Congress, under which books on space science projects can be located in most card, book, and online catalogs, include those listed below.

ASTRONAUTICS—EXPERIMENTS (Highly relevant)

ASTRONOMY—EXHIBITIONS (Highly relevant)

ASTRONOMY-EXPERIMENTS (Highly relevant)

EARTH SCIENCES—EXPERIMENTS (Highly relevant)

SCIENCE—EXHIBITIONS (Highly relevant)

SCIENCE—EXPERIMENTS (Highly relevant)

See also subdivision EXPERIMENTS under subject headings of particular interest, such as AIR, FLIGHT, PHYSICS

SCIENCE PROJECTS—(Highly relevant)

SPACE FLIGHT-EXPERIMENTS (Highly relevant)

SPACE SCIENCES—EXPERIMENTS (Highly relevant)

SPACE SHUTTLES—EXPERIMENTS (Highly relevant)

CLOSED ECOLOGICAL SYSTEMS (SPACE ENVIRONMENT) (Relevant)

COSMIC PHYSICS (Relevant)

MANNED SPACE FLIGHT (Relevant)

PEST CAPY AVAILABLY

OUTER SPACE—EXPLORATION (Relevant)

ROCKETS (AERONAUTICS)—(Relevant)

SCIENCE—STUDY AND TEACHING (Relevant)

See also subdivisions STUDY AND TEACHING; PROBLEMS, EXERCISES, ETC.; and AMATEURS' MANUALS under subject headings of interest, such as ASTRONOMY, ASTROPHYSICS, or SPACE SCIENCES

SKYLAB PROGRAM (Relevant)

SPACE BIOLOGY (Relevant)

SPACE MEDICINE (Relevant)

SPACE STATIONS (Relevant)

SPACE VEHICLES (Relevant)

SPACELAB PROJECT (Relevant)

SPACE INDUSTRIALIZATION (Related)

RESEARCH-METHODOLOGY (More general)

## BASIC TEXTS

Bombaugh, Ruth. Science fair success. Hillside, N.J., Enslow Publishers, c1990. 96 p. Bibliography: p. 85-87. Q182.3.B66 1990

List of suppliers: p. 75-84.

A guide for choosing, designing, and completing an investigative science fair project, with an appendix listing prize-winning projects by junior high school students.

- Bonnet, Robert L., and Dan Keen. Space and astronomy: 49 science fair projects. Blue Ridge Summit, Pa., TAB Books, c1992. 128 p. QB64.B64 1991 Suggests a variety of astronomy projects suitable for science fairs, involving the stars, moon, planets, and Milky Way.
- Gardner, Robert. Projects in space science. New York, J. Messner, 1988. 128 p. QB500.264.G37 1988

  Information about and experiments relating to the origin of the solar system, the laws of motion, natural forces affecting orbiting objects, man's future in space, and other aspects of space science.
- The Long duration exposure facility (LDEF): mission 1 experiments. Edited by Lenwood G. Clark and others. Washington, Scientific and Technical Information Branch, National Aeronautics and Space Administration; Springfield, Va., for sale by the National Technical Information Service, 1984. 189 p. (NASA SP-473)

  QB500.264.L66 1984
- McKay, David W., and Bruce G. Smith. Space science. New York, F. Watts, 1986.

  127 p.
  QB500.264.M36 1986

  Ideas and instructions for a variety of science projects that examine the characteristics of the space environment and consider forces such as gravity, magnetism, and buoyancy.

Moeschl, Richard. Exploring the sky: 100 projects for beginning astronomers. Chicago, Chicago Review Press, c1989. 339 p. QB64.M6 1989

Rev. ed. to be published in March 1993.

Presentation of projects includes information on related mythology and pertinent history, cultures, and people.

- Moulton, Robert R. First to fly. Foreword by James A. Abrahamson. Minneapolis, Lerner Publications Co., c1983. 119 p. QL496.7.M68 1983

  An account of 18-year-old Todd Nelson's experiment, "Insect in Flight Motion Study," which was the first student experiment ever to fly aboard a manned space shuttle flight.
- Simon, Seymour. How to be a space scientist in your own home. New York, Lippincott, c1982. 83 p. QB500.S545 1982

  A collection of experiments using easily available, inexpensive materials, which duplicate some principles and problems encountered in space flight.
- Vogt, Gregory. The space shuttle. New York, F. Watts, 1983. 122 p.
  Includes bibliographical references. QB500.264.V63 1983
  Discusses experiments proposed by high school students that have been performed aboard Skylab and gives advice to those interested in similar space research competitions.

#### SPECIALIZED TEXTS

- Apfel, Necia H. Astronomy projects for young scientists. New York, Arco Pub., c1984.

  122 p. QB62.7.A64 1984

  Instructions for a variety of experiments in astronomy including making a telescope, building a planetarium, measuring the circumference of the Earth, and detecting cosmic rays.
- Covington, Michael A. Astrophotography for the amateur. Rev. ed. Cambridge, New York, Cambridge University Press, c1991. 168 p. QB121.C68 1991
- Docekal, Eileen M. Sky detective: investigating the mysteries of space. New York, Sterling Pub. Co., 1992. 128 p. QB63.D55 1992

  Text and suggested activities help the reader explore the many aspects of the night sky, including the stars, constellations, and planets.
- Lunetta, Vincent N., and Shimshon Novick. Inquiring and problem-solving in the physical sciences: a sourcebook. Dubuque, Iowa, Kendall/Hunt Pub. Co., c1982. 202 p. Q182.3.L86 1982 <SciRR>
- Petty, Kate. Build your own space station. New York, F. Watts, 1985. 30 p.

  TL844.P48 1985

  Step-by-step instructions for constructing a space station and space vehicles out

of materials available at home or school.

- Robson, Pam. Air, wind & flight. New York, Gloucester Press, 1992. 32 p.

  TL547.S42 1992

  Examines flight, propulsion, and power, and applies basic principles of aerodynamics to explore and experiment with the properties of air.
- Sweet potato for space missions—controlled environmental life support systems. Editors, Walter A. Hill, Philip A. Loretan, Conrad K. Bonsi. Tuskegee Institute, Ala., Carver Research Foundation of the Tuskegee Institute, George Washington Carver Agricultural Experiment Station, c1984. 81 p. (George Washington Carver Agricultural Experiment Station monograph, #1)

  Bibliography: p. 67-81. SB211.S9S93 1984 and <SciRR Pamphlet Box>
- Trowbridge, Leslie W. Experiments in meteorology: investigations for the amateur scientist. Garden City, N.Y., Doubleday, 1973. 270 p. QC863.4.T76 <SciRR> Bibliography: p. 255-259.
- VanCleave, Janice Pratt. Janice VanCleave's astronomy for every kid: 101 easy experiments that really work. New York, Wiley, c1991. 229 p. QB46.V36 1991 An elementary science experiment book that provides young scientists with safe, workable astronomy projects.
- Zubrowski, Bernie. Balloons: building and experimenting with inflatable toys. New York, Morrow Junior Books, c1990. 79 p. QC33.Z83 1990

#### CLASSROOM EXPERIMENTS AND ACTIVITIES

- Aviation science activities for elementary grades. Rev. 1983. Washington, Office of Public Affairs, Aviation Education Programs, Federal Aviation Administration, U.S. Dept. of Transportation, 1985. 33 p. <a href="SciRR">SciRR</a> Pamphlet Box> "GA-20-30."

- Schaaf, Fred. Seeing the solar system: telescopic projects, activities, and explorations in astronomy. New York, Wiley, c1991. 208 p. QB64.S4273 1991 Bibliography: p. 200-203.
- Skylab, classroom in space. Edited by Lee B. [i.e. R.] Summerlin. Prepared by George C. Marshall Space Flight Center. Washington, Scientific & Technical Information Office, National Aeronautics and Space Administration; for sale by the Supt. of Docs., U.S. Govt. Print. Off., 1977. 182 p. (NASA SP-401) TL789.8.U6S5675
- Smith, P. Sean. Project earth science: astronomy. Washington, National Science Teachers Association, c1992. 155 p. QB61.S553 1992 Includes bibliographical references (p. 140-151).
- Vacca, John R. Reach for the stars: a time to act. Space age times, v. 15, July/Aug. 1988: 4-8. 

  "The crisis in space education and one teacher's solution."

## **BACKGROUND READINGS**

- Asimov, Isaac, and Frank White. Think about space: where have we been and where are we going? New York, Walker, 1989. 132 p. QB500.22.A84 1989

  An overview of the history and present and future role of human beings in space, tracing the development of space exploration and discussing the challenges of the present day and the possibilities of the future.
- Baker, David. The history of manned space flight. New York, Crown Publishers, 1982. 544 p. TL873.B33 1982 <SciRR>
- Berger, Melvin. Star gazing, comet tracking, and sky mapping. New York, G. P. Putnam's Sons, c1985. 80 p. QB64.B47 1985 Explains how to learn about stars, constellations, comets, and other astronomical phenomena by studying the sky without a telescope.
- Booth, Nicholas. Space: the next 100 years. New York, Orion Books, c1996. 128 p. TL793.B633 1990
- Compton, William David, and Charles D. Benson. Living and working in space: a history of Skylab. Washington, Scientific and Technical Information Branch, National Aeronaut.cs and Space Administration; for sale by the Supt. of Docs., U.S. Govt. Print. Off., 1983. 449 p. (NASA SP-4208)

  Bibliography: p. 397-442. TL789.8.U6S5546 1983 <SciRR>
- Gallant, Roy A. Rainbows, mirages, and sundogs: the sky as a source of wonder. New York, Macmillan, c1987. 94 p. QC975.3.G45 1987

  Discusses and explains visual phenomena seen in the sky, primarily interactions of light and atmosphere such as rainbows, mirages, the twinkling of stars, the blue color of the sky, and the northern lights.
- Herbst, Judith. Sky above and worlds beyond. New York, Atheneum, 1983. 228 p.
  Bibliography: p. 222-223. QB46.H38 1983
  An introduction to astronomy, examining planetary and stellar motions, ancient concepts of the universe, the solar system, astronomy's wild goose chases, Einstein's mass/time relationship, stellar evolution, and the unexplained mysteries of space. Includes star charts.
- Life in space. Alexandria, Va., Time-Life Books, 1983. 304 p.

SciRR Best Books Vertical File> Published annually since 1963, this is an annotated bibliography of new books in science, technology, consumer medicine, and related subjects intended primarily for the general adult reader. A special feature is the selection of books for libraries which buy only 50-100 titles each year.

Wolff, Kr.thryn, Susan M. O'Connell, and Valerie J. Montenegro. AAAS science book list, 1978-1986. Washington, American Association for the Advancement of Science, 1986. 568 p. (AAAS publication, 85-24) Q181.A1A68 no. 85-24 <SciRR>

ABSTRACTING AND INDEXING SERVICES that index relevant journal articles and other literature on science projects in general are listed below. Some suggested terms are given as aids in searching. Space sciences material will be indexed under terms beginning ASTRONOMY, ASTRONAUTICS, SPACE, etc. The following indexes are available in most public and college libraries. Consult reference librarian for locations of these materials in Science Reading Room; some are available in CD-ROM format.

The Universe in the Classroom: a Newsletter on Teaching Astronomy NOT IN LC

#### REPRESENTATIVE JOURNAL ARTICLES

Bartlett, Albert A., and Charles W. Hord. The slingshot effect: explanation and analogies. *Physics teacher*, v. 23, Nov. 1985: 466-473. QC30.P48

Beggs, James M., and others. Space station 1995. Aerospace America, v. 23, Sept. 1985: 44-52, 56-62, 66-67, 70-74, 76. TL501.A688A25

Carroll, W. F., and others. Should we make products on the moon? Astronautics & aeronautics, v. 21, June 1983: 80-85. TL501.A688A25

Culbertson, Philip E. Using space. Chemtech, v. 15, Apr. 1985: 214-217. TP1.I612

Davies, John. Science from the Space Station. Space education, v. 1, autumn/winter 1986/87: 560-563. <SciRR Pamphlet Box>

Hillman, Alan L. After the Challenger: biomedical opportunities in space. New England journal of medicine, v. 315, Nov. 6, 1986: 1196-1200. R11.B7

Loftus, Joseph P. Man's role in space exploration and exploitation. Spaceflight, v. 29, June 1987: 240-247. TL787.B725

Martin, Helen E. Could you build a satellite tracking station? Don't say 'no' until you try. Science teacher, v. 54, Jan. 1987: 15-17. Q181.S38

Meyers, Marilyn. Space Camp diary. Space world, v. Y-4-292, Apr. 1988: 14-15.

TL787.S72

- Rapp, Carl Steven. Build your own radio telescope; avoid the astronomical costs of high-tech equipment. Science teacher, v. 60, Jan. 1993: 35-36. Q181.S38
- Russo, Richard. Solstice science: a lesson in archaeoastronomy. Science teacher, v. 59, Dec. 1992: 14-17. Q181.S38
- Shugrue, Sylvia K. Astronomy with a stick; daytime astronomy for fifth- and sixth-grade students. Science activities, v. 28, winter 1991/92: 27-37. Q181.A1S29
- Van Allen, James A. Space science, space technology and the space station. Scientific American, v. 254, Jan. 1986: 32-39.
- Vander Linde, Karen. SEEDS in space. Science and children, v. 22, Sept. 1984: 26. LB1585.S34

# SELECTED MATERIALS available in the Science Reading Room pamphlet boxes include:

- Beabout, Gieg. Your first date with a 2.4-inch scope; use these tips to set up your first scope and start observing planets and deep-sky objects. *Astronomy*, v. 21, Jan. 1993: 80-85.
- Bole-Becker, Luanne C. The Challenger Center: keeping the dream alive; the educational legacy of the Challenger crew will connect them to the students of tomorrow. Ad astra, v. 2, Sept. 1990: 23-26.
- Cobaugh, Stephen M. Discovery flight gave young experimenters a second chance. Space age times, v. 15, Sept./Oct. 1988: 12-13.
- Estabrook, Barry. The crucial experiments. Science dimension, v. 17, no. 4, 1985: 21-28. Describes Challenger's Mission 41-G and the experiences of Marc Garneau, Canada's first astronaut in space.
- Frazer, Lance. Can people survive in space? Living in zero-g does weird things to the human body. Ad astra, v. 3, Oct. 1991: 14-18.
- Grigsby, Doris K., and Mary H. Lewis. Tomatoes in space. Science and children, v. 21, Mar. 1984: 6-7.
- Hofman, Helenmarie. Not for science students only: the Space Science Student Involvement Program offers contests that challenge students talented in art and writing as well as those interested in basic science. In *Science year*. 1993. Chicago, World Book, 1992. p. 148-159.
- Metzger, Claire. Ants ride along with Sally. Science activities, v. 21, Feb./Mar. 1984: 29-31.
- O'Meara, Stephen James. Planet watch: amateur astronomers monitor spectacular clouds and storm systems on Mars, Jupiter, and Saturn. Science probe! v. 1, Oct. 1991: 67-74.

Overbye, Dennis. Spacelab: doing science in orbit. Discover, v. 5, Feb. 1984: 16-21.

Strickland, John K. The cosmic classroom: a Texas junior high is building its own space station—right here on earth. Ad astra, v. 1, Mar. 1989: 20-23.

Teacher in space project. Washington, National Aeronautics and Space Administration, 1985. 16 p.

"The publication is the product of a team effort by NASA, the National Science Teachers Association (NSTA), the National Council for the Social Studies (NCSS), and curriculum professionals."

"NASA Teacher Resource Centers": p. 16.

"Resources": p. 16.

Vogt, Gregory. Rockets: information and activities for elementary teachers to use in preparing students for a unit on model rocketry. Washington, National Aeronautics and Space Administration, 1992. 32 p.

"PED-112."

Includes a list of model rocketry manufacturers (p. 32).

The Young astronaut program; a four-year-old organization offers space education to more than 500,000 elementary and high school students. *Space times*, v. 27, Sept./Oct. 1988: 8-9.

Yulsman, Tom. Experiments in space. Science digest, v. 92, July 1984: 39-45, 92-93.

## ADDITIONAL SOURCES OF INFORMATION

Astronomical Society of the Pacific

390 Ashton Avenue

San Francisco, California 94112

Telephone: (415) 337-1100

A non-profit scientific and educational organization dedicated to supporting astronomical research and to increasing public understanding and appreciation of science. Its services include organizing workshops on teaching astronomy, the distribution of a catalog of educational aids in astronomy, and the publication of several journals including *Mercury* and *The Universe in the Classroom*, a quarterly newsletter for teachers.

Challenger Center for Space Science Education

1055 North Fairfax Street

Suite 100

Alexandria, Virginia 22314

Telephone: (703) 683-9740

A not-for-profit educational institution that works with educators, scientists, business leaders, and others to create hands-on learning experiences for students and teachers.

Department of Science, Space, and Technology

National Science Teachers Association

1742 Connecticut Avenue Washington, D.C. 20009

Telephone: (202) 328-5800, ext. 22

Sponsors with NASA, the NEWMAST (NASA Educational Workshops for Math and Science Teachers) Workshops held during the summer at NASA Teacher Resource Centers throughout the country, the NEWEST (NASA Educational Workshops for Elementary School Teachers) Workshops, and the Space Science Student Involvement Program.

Kansas Cosmosphere and Space Center

1100 North Plum Street Hutchinson, Kansas 67501 Telephone: (316) 662-2305

Offers Discovery workshops for school children and a Future Astronaut Training Program in summer camp sessions for students entering 7th, 8th or 9th grades. Students from across the country and abroad are welcome to apply. All classes are filled on a first-come, first-serve basis.

#### **NASA**

Elementary and Secondary Branch

Education Division NASA Headquarters 300 E Street, S.W.

Code: FEE

Washington, D.C. 20546 Telephone: (202) 358-1518

Provides specialists for school visits and educational materials for teachers through its

network of Teacher Resource Centers and CORE.

Educational Publications Branch

Education Division NASA Headquarters 300 E Street, S.W.

Code: FEP

Washington, D.C. 20546 Telephone: (202) 358-1535

Will distribute free copies of its publications as long as they are in stock.

Central Operation of Resources for Educators (CORE)

**NASA** 

Loraine County Joint Vocational School

15181 Route 58 South Oberlin, Ohio 44074

Telephone: (216) 774-1051, ext. 293 or ext. 294

Provides NASA educational audiovisual materials by mail to teachers who are not near a Teacher Resource Center. Educators can request a catalog of available materials by writing NASA CORE on school letterhead.

Science Service 1719 N Street, N.W. Washington, D.C. 20036 Telephone: (202) 785-2255

Administers the International Science and Engineering Fair and the Westinghouse Science Talent Search.

Space and Aviation Education Resource Center United States Space Foundation 1525 Vapor Trail Colorado Springs, Colorado 80916 Telephone: (719) 576-8000

U.S. Space Camp
The Space & Rocket Center
Tranquility Base
Huntsville, Alabama 35807
Telephone: (205) 837-3400 or 1-800-63SPACE
Camp term is one week for 4th-9th graders; 10 days for 10th-12th graders.

Young Astronaut Program 1308 19th Street, N.W. Washington, D.C. 20036 Telephone: (202) 682-1984

Distributes learning packets on subjects such as colonizing space, flight, and the Hubble Space Telescope. The packets include activities for young astronaut leaders and resources for teachers.
